DILE  **OFFICE**®

adapta
prop
ata

Fully adaptable to the physical conditions of each user. Able to assume hundreds of different positions thanks to the extraordinary movement system. The intelligent choice for today's office in the search for perfection and to satisfy the most stringent ergonomic demands.

adapta

Active ergonomics, with a backrest which adapts to the natural curves of the human back, helping maintain a healthy posture.

Precise regulation, which thanks to its system of armrest elevation, can be adapted to any one of 7 different positions.

Its *syncro*, position system with independent options for seat and backrest, allow us to choose the seating angle individually, as well as to adapt the depth and even deactivate the system, in order to gain total freedom of movement.

An eye for detail. Each detail is important, each detail selected. Wheels with chrome protectors.

Backrest with ergonomic form

Adjustable-height steel armrest

Independent *syncro* mechanisms for seat and backrest
Gas elevation system

Gradual adjustment of backrest angle

Gradual adjustment of seat angle

Base made of polished aluminium and rubber wheels
with chromium steel cover
