

GAMMA [affordable ergonomics]

[high back with headrest]
GAMMA

GH1

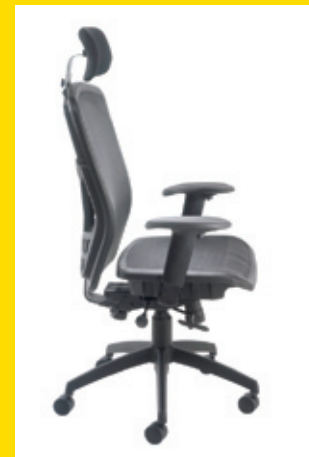

With extreme comfort and design in detail, the Gamma offers all round control and versatility to all users.

The subtle mesh contour on the seat and back gives the Gamma a light and airy appearance as well as offering ventilation to reduce heat build up and muscle fatigue.

Individuality comes with the chairs ergonomically designed controls. Each movement can be optimised by the user to suit every seating position.

GM2

The synchronised mechanism has tension control adjustment, is lockable in multiple positions and features anti-shock release ensuring the user is in complete control.

A seat slide function also allows the user to set the correct seat depth which is vital to ensure the chair is suited to the users leg length. Height and width adjustable arm rests again allow the user to tailor the chair to their individual requirements and come as standard on the visitors chair.
