

ECO POSTURE

Eco Posture

Eco Posture is a robust task chair that provides all the adjustments required to support healthy posture with a variety of mechanism and armrest options. With a correct seating position being essential for good long term posture, the Eco Posture offers a choice of two mechanisms to support this ethos.

Mechanism (3) provides three independent controls: a seat height and seat tilt adjustment lever with a backrest angle adjustment lever. Mechanism (4) provides a seat height adjustment lever and a lever that allows the seat and backrest to form a synchronised tilting motion at a 2:1 ratio. Both chair options have finger tip height adjustable backrest.

Standard Features

- Large seat & extra high back
- Contoured seat and backrest
- Variable tension adjustment
- Height adjustable backrest
- Seat slide providing adjustable seat depth
- Inflatable lumbar support

Optional Features

- Wide selection of armrests
- Foldaway height adjustable armrests
- Sliding & rotating adjustable armrests
- Polished chrome base
